

DRC WORLD

Believing that diamonds should not cost the earth, DRC DIA TECH brings forward an absolute Eco-friendly and indistinguishable alternative of earth mined diamonds.

The diamonds that we offer are grown from the finest diamond seeds in a carefully controlled environment where our labs are equipped with all latest apparatus and tech heads ensuring a consistent supply of Type IIA diamonds.

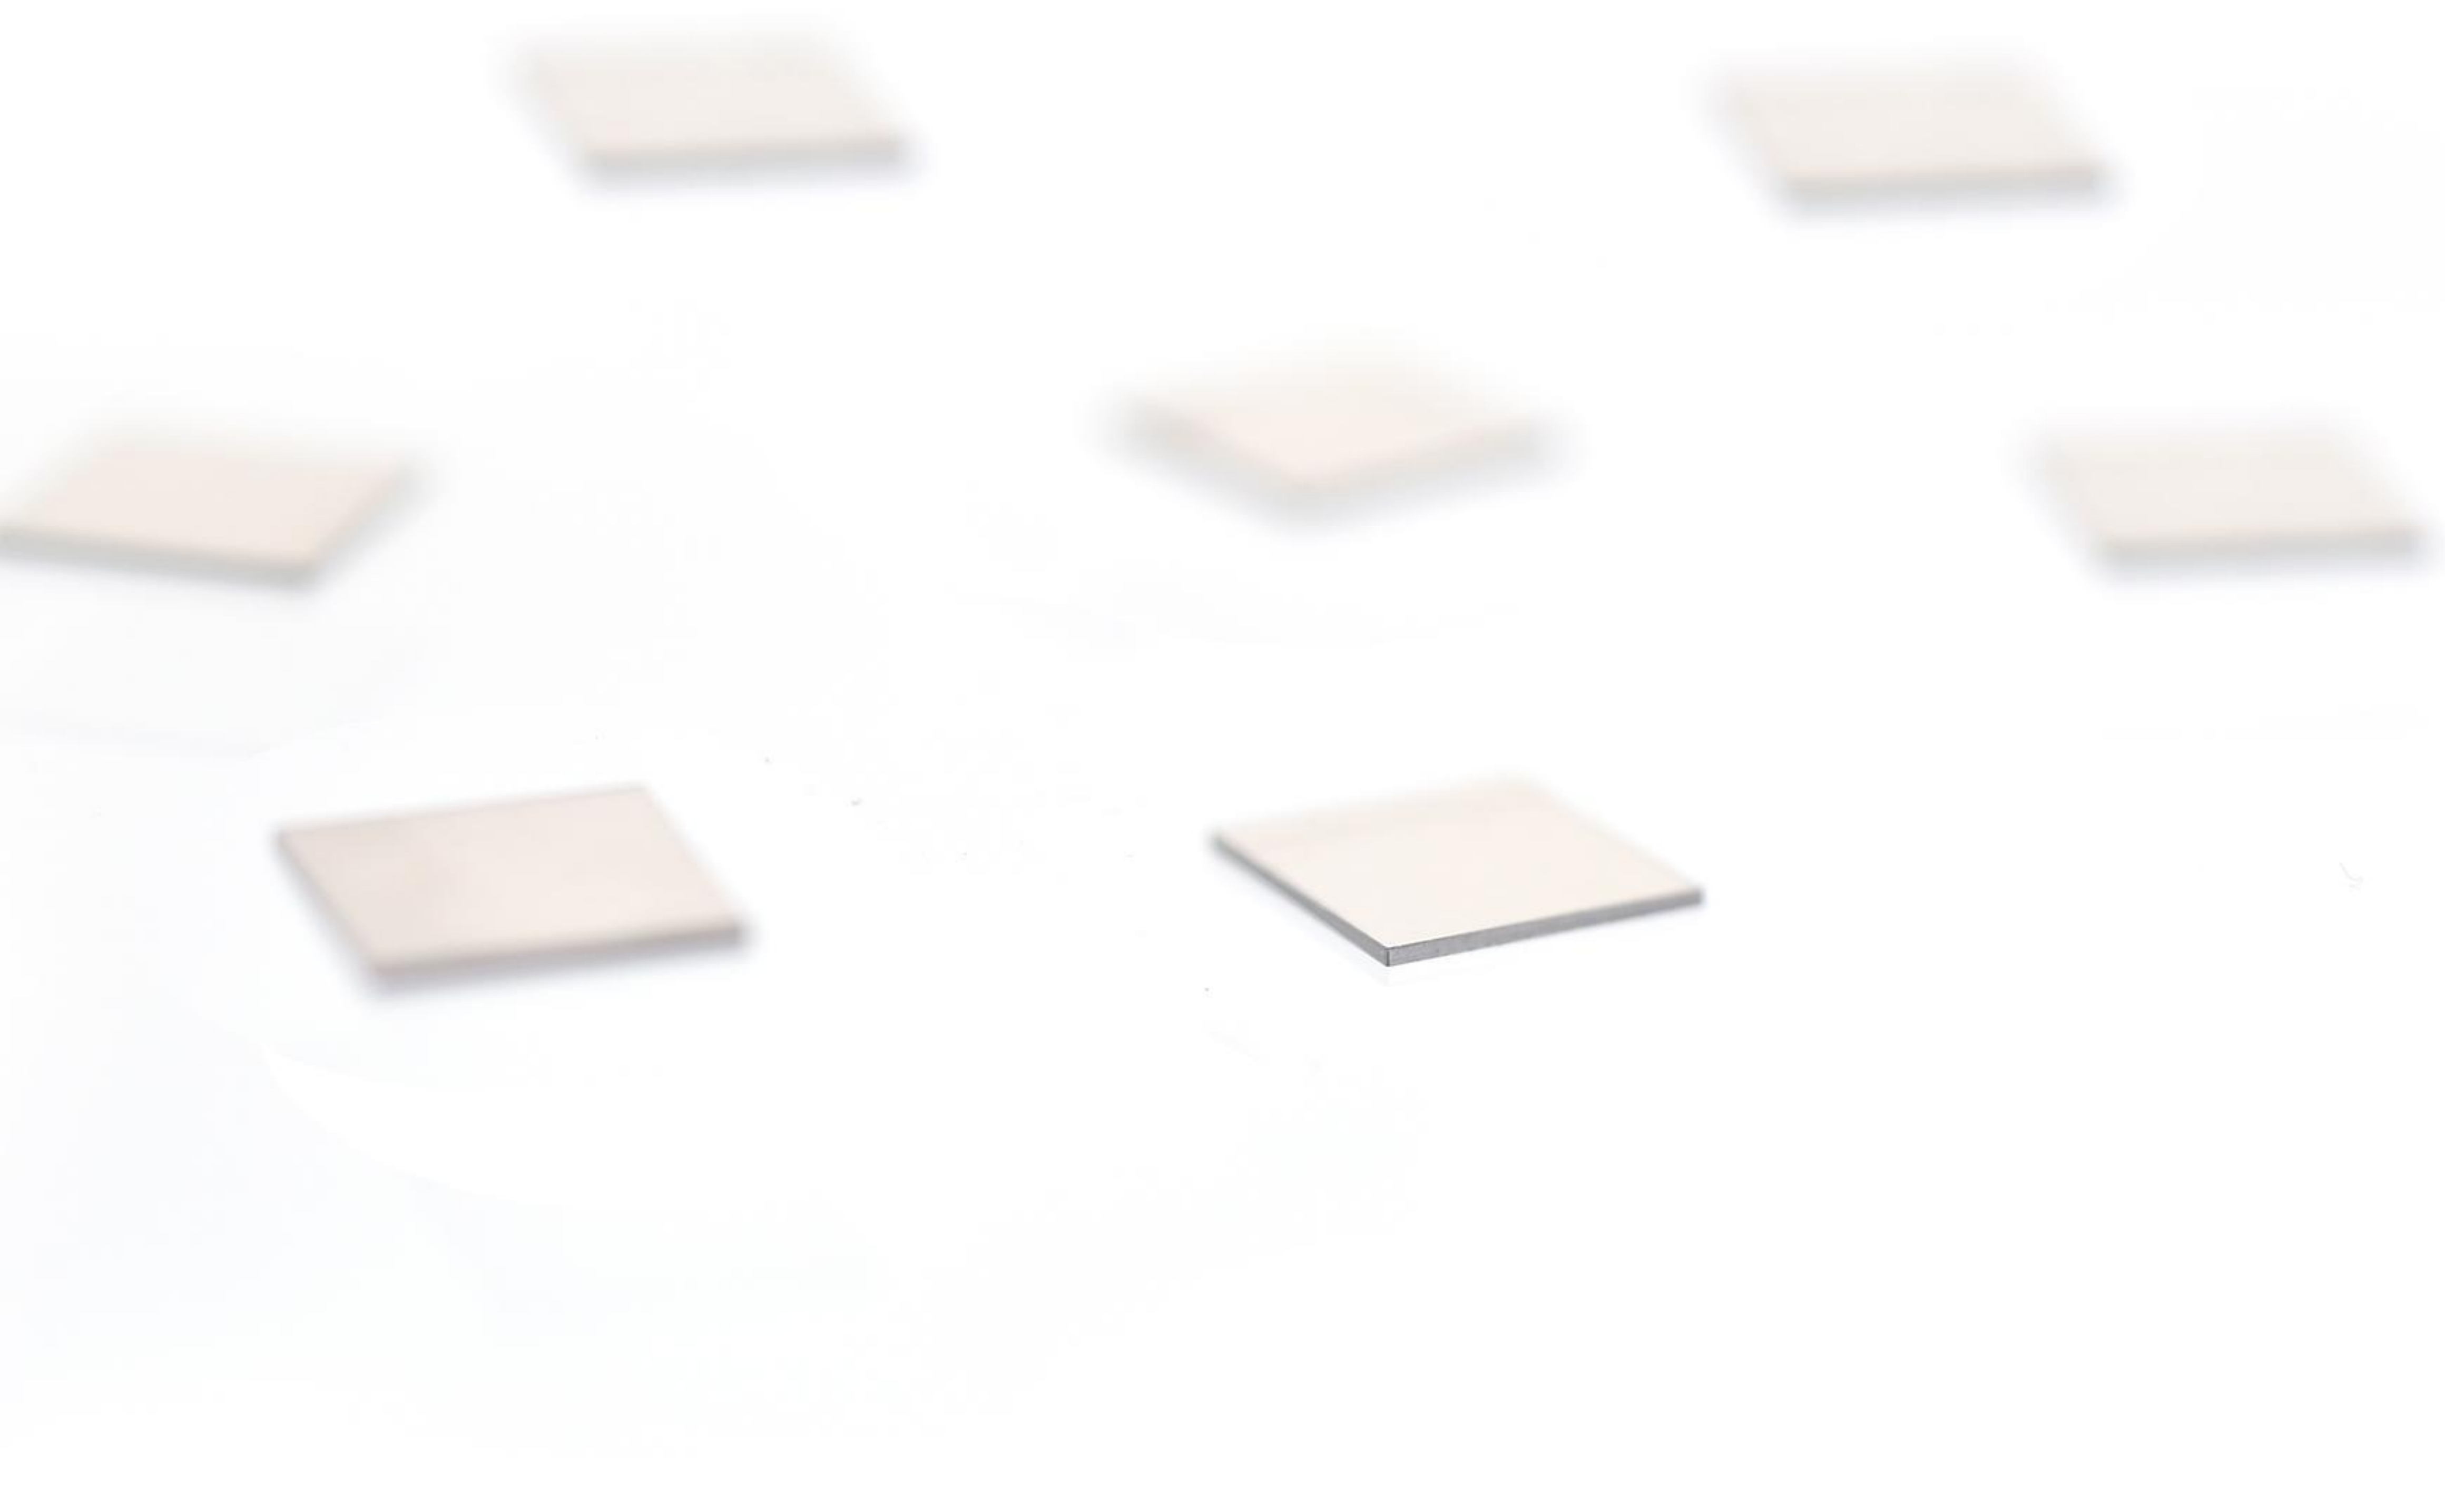

CVD DIAMONDS

CVD or Chemical Vapor Deposition, is a process in which the gem is grown in a small pressurized chamber. In this process the combination of gases is used to grow diamond around a seed crystal.

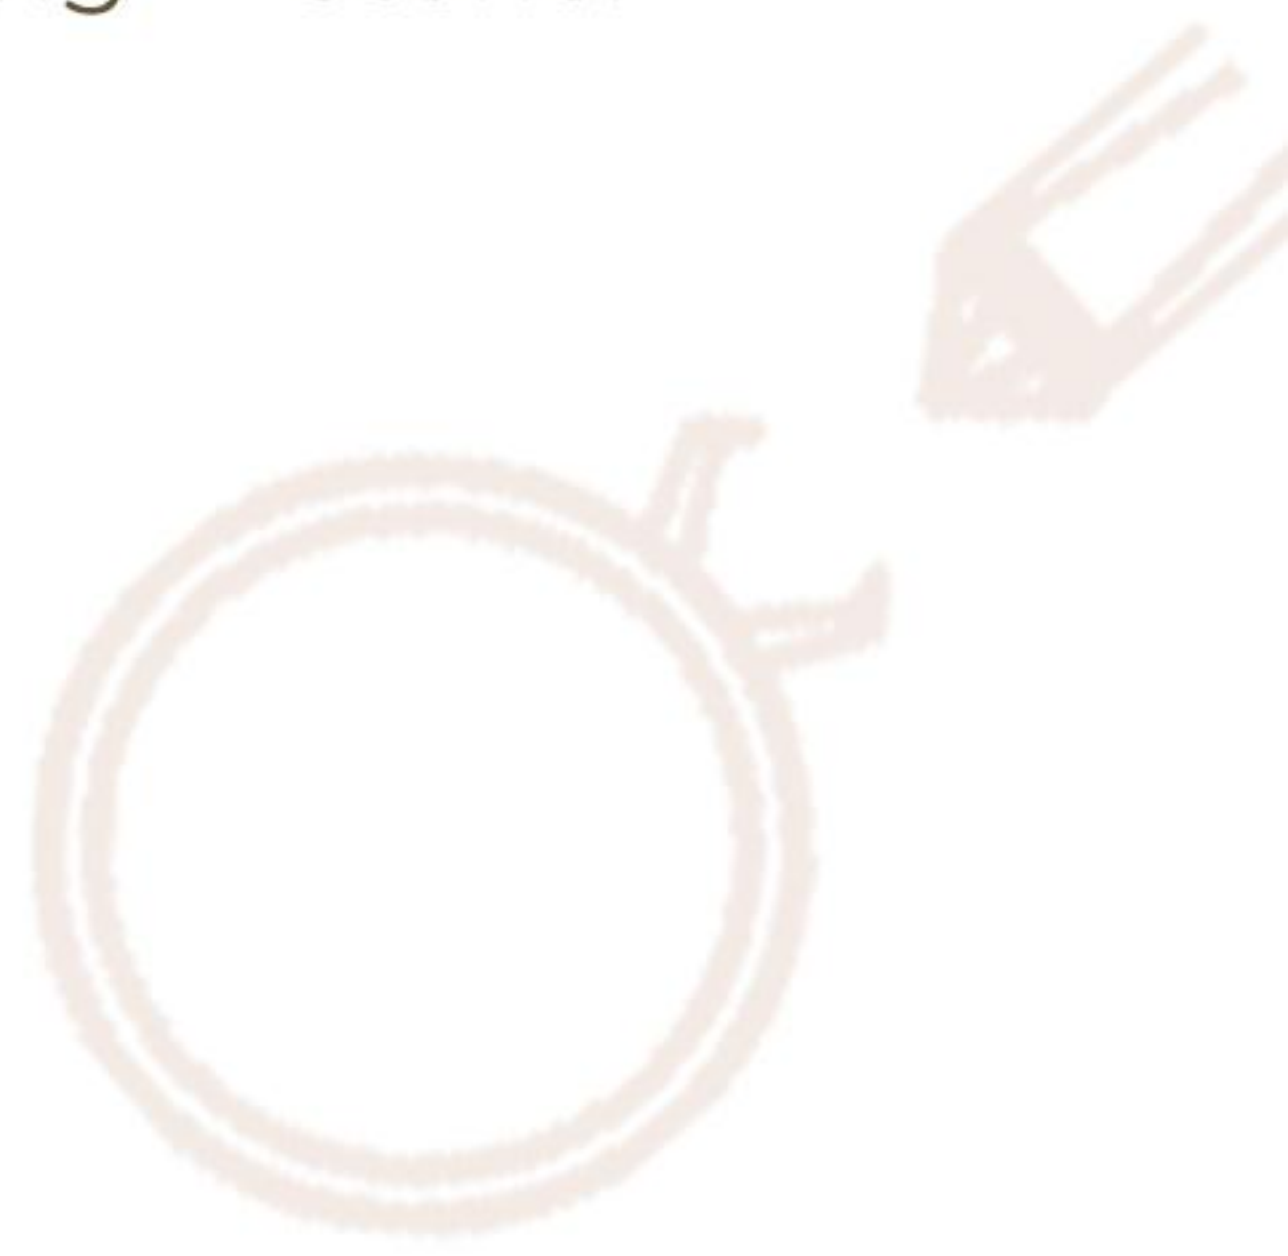

PROCESS OF DRC CREATED DIAMONDS

Skilled lab experts select the finest quality diamond seeds and carefully place them on a metal disk, inside the machine.

Powered with the CVD technique, the magic starts to happen and in a matter of around 10-12 weeks, the diamond grows to its maximum potential.

Taken out from the chamber these diamonds need cutting and polishing. Our master cutters have expert knowledge, tools and techniques to glow and enhance the facet of raw diamonds and there comes a “Sustainable - Smart - Shinning - Stone.”

*We are here to serve you right and in an economical way. For us,
consistent quality of product and satisfaction of customers
matters the most.*

Superior stones with brighter shine

DRC CREATED DIAMONDS

- **Exceptional quality and purity:** Because DRC Created diamonds are curated in controlled conditions, they are superior in many aspects.
- **Guilt-free:** Naturally mined stones are sourced from conflicted regions, carrying the stories of child labour, poor working conditions and human rights violation — no wonder why they are often called Blood Diamonds. Contrastingly, DRC Created diamonds are a remarkable guilt free possession for a conscious customer.

DRC CREATED DIAMONDS

- **Affordable:** With the same composition and properties as of natural diamonds, the DRC Created diamonds cost a fraction of them.
- **Eco-friendly:** Digging out diamonds from the earth means cutting down of trees, depletion of fossil fuels and degrading the quality of air and water. Buying a DRC Created diamond is a step towards sustainability and responsibility; it has no harmful effects around.

Converging, excellence, affordability & environmental stability.
